Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a method comprising the step of monitoring a dynamic condition to adjust drive strength, classified in class 326, subclass 82.
 - II. Claims 17-30, drawn to a method comprising the step of monitoring a bit pattern to adjust impedance, classified in class 326, subclass 30.
 - III. Claims 31-34, drawn to an apparatus comprising a storage element and a dynamic controller, classified in class 326, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Groups I, II and III has separate utility such as a subcombination of a different inventions. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to J Larson on 1/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
